Flowback Jr. Operator – Self Employed Contractor Present

July 2018-

As a Flowback Jr. Operator I can run drill outs or assist with them. That includes keeping an accurate return rate through the use of a 2 or 3 inch manifold. Monitor differential pressures from upstream to down stream and strap tanks and calculate the return rate. I also equalize the frac tanks and use the transfer pumps to ensure tanks do not overflow. I also assist in Well test. This includes strapping tanks and doing reports. It also includes running the manifolds and dumping SKO's. I also have the ability to do production watches and Frac support.

Flowback Hand – Intergrity LLC- Midland, TX May 2018

August 2017-

I assisted with drill outs and production batteries. That included dumping sand traps, working with the manifold and gauging tank.

Sand Coordinator/Field Safety Supervisor- Detmar LLC-San Angelo, TX March 2018- July 2018

As a Sand Coordinator, we work with the drivers and dispatch to ensure the proper sand was emptied in to the proper silos in order to keep the Frac location running.

Area Manager – Walmart Distrubtion Center- Palestine, TX March 2018

August 2017 –

Managed up to 40 employees daily at a Walmart Logistics facility in the FID area. Managed to the day to day operations of a particular area, including daily meetings and feedback to associates. We also had daily forecasting goals and meetings to go over better ways to make the building and company more efficient. It also includes using Microsoft office and Walmart's own computer program. Directly involved in the recruitment and retention of Walmart associates.
